Tamarind is actually the fruit pod produced by tall, semi-evergreen tree grown primarily in India. The beans and pulp within the pod are virtually no smell, but it has an extremely sour taste. Tamarind is available in whole pods, a compressed block, paste or concentrates and is most likely to be found in Asian markets.

## Varieties of Tamarind

- ▶ Seed Tamarind
- ▶ Tamarind D-fibre
- ▶ Flower Tamarind

# Coriander Seeds

We provide Fresh Coriander Seeds that are sourced from the trusted vendors who are quality cautious. We have firmly positioned ourselves as one of the Coriander Seeds buyer based in India. Medicinal and culinary properties of our Natural Coriander Seeds make them perfect to be used in the preparation of foods. Commonly used for flavoring the foods, our Natural Coriander Seeds are in huge demand. Coriander is my Number 1 gas buster and helps to stimulate the appetite. Coriander seed can be used for making a medicinal tea to soothe an upset stomach, to treat indigestion, and mild gastrointestinal upsets. Sugar-coated coriander seeds are used as a breath freshener in India. Coriander is known to lower blood sugar by stimulating the secretion of insulin. As a matter of fact, it is called an "anti-diabetic" plant.
